THIRTEENTH ANNUAL BULB CATALOG
FOR 1924

ELTWEEN POMEROY, BULB SPECIALIST
LAGRANJA FARM, DONNA, TEXAS

FOREWORD

TOO MANY VARIETIES—We have tested over 350
types of canna. This is too many. If on testing, a
can name proves similar in leaf, flower, habit of growth, etc. to an
old one but poorer in any particular, it goes
onto the scrap heap and the better old one is given when
that is ordered. Thus Lafayette is a so-called new canna.
On testing out it proves to be identical but poorer
than old Jean Tissot. It is thrown into discard and Jean Tissot
given in its place. If on the other hand the new one
proves similar in every way to an old canna but better
in every single particular, the old one is sold out and
the new one grown and given in its place.
Thus Julius Koch is identical in every way with Black
Prince and Mephisto but the flowers are larger and
the trusses thicker with flowers. As soon as Black Prince
and Mephisto are sold out, Julius Koch will be given for
all three.

HOW DISTINGUISHED—The most improved varieties
which are the only ones we grow are distinguished by
Capitals. The similar but not so good are in small letters.
When sold out, the better ones are given.

CLASSIFICATION—1st, by color of flower; 2nd, by
leaf, whether green or bronze; 3rd, by heights; 4th, by
color of flower in which there are two main classes, although
these melt into each other.
A.—Orchid which has one or two large flowers opening
at one time which mature, drop off and open and others open.
B.—Truss where the individual flowers are small but
more open at one time making a truss of bloom of great
effectiveness.
C.—There is a third class of foliage canna where the
flowers are inconspicuous but the foliage is large and fine.

TWO LISTS—1st, by color of flower, then by character
of flower, color of leaf, height, etc. 2nd, alphabetical but
followed by color of flower so descriptions can be found

BUSINESS CONDITIONS

PRICES AND DISCOUNTS—With decreasing costs, we
can sell for less but these lists occasionally fall into
hands of consumers; so instead of lowering our list prices,
we are prepared to give dealers a discount on application.

QUANTITIES—A half dozen sold at dozen prices, 50
at 100 price, 500 at 1,000 price. Where an assorted lot
of not less than 5,000 are wanted, you get 250 at the
1,000 price.

SHIPPING—Unless ordered to contrary, lots of less
than 1,000 pounds go by express and after March 1st lots
up to 500 pounds go by express. All others by freight.

TERMS—30 days or 2 per cent, for cash within 10 days
of date of invoice.

COMPLAINTS—Should be made within five days
of receipt of bulbs. It is difficult to affix responsibility and
rectify if time passes.

SIZE OF BULBS—In this favored soil and climate, we
have ground storage, that is, having no frost in the ground,
we dig our bulbs just before shipping, getting large,
plump bulbs which start growing quickly and soon bring
flowers much different from the winter-stored, weary
bulbs grown north. Canna bulbs always have two eyes
and usually three or four.

WEIGHT—Fresh dug canna bulbs weigh from 200 to
300 pounds per 1,000 according to variety. They will
average 250 pounds when packed in sacks and 300 pounds
when in boxes.

GUARANTEE—We agree to deliver bulbs true to
name but should that rare case come where they are not,
we will replace or repay the amount paid but are not
liable for more.

CANNA DESCRIPTIONS

BY COLOR OF FLOWER
For Prices See Alphabetical List

Red Orchid Flower
5 to 6 Feet High. Green Foliage.

UNCLE SAM. Louisiana, Pennsylvania, Altitudes,
New Chicago, Price Wied. Flower a deep, vivid crimson,
the darkest and bluest of this class and one of the larg-
est, usually 6 to 7 inches across with crinkly edge and
silky sheen.

MRS. KATE GREY. Atlanta, Jollet, Mrs. Kari Kelsey.
Same as preceding but flowers are a bright scarlet often
streaked with fiery orange.

AMERICAN BEAUTY. Wm. Boffinger. Same as
preceding but larger flowers of more sturdy substance.
Stock of American Beauty was obtained from Howard &
Smith years before Conard & Jones put an American
Beauty on the market and it has been catalogued by me
for at least two years before C. & J. took the name.
NOTE: I have tried so many muchly vaunted, so-called new cannas answering to the general description of above and found them either poorer than my carefully selected strains or identical, that I have now ceased to get and try out more as I believe this type is so fixed now that it can only be improved by selection of growing stock.

COLOSSAL. (Wintzer's). The largest canna which grows, flowers often 8 inches across but petals droop and are not as firm as smaller flowers. Color a deep crimson red. Height 4 to 5 feet.

FIERY CROSS. President, Firebird, Oiseau de Feu. The flower on this is neither a crimson (blue-red) nor scarlet (orange-red) but a glowing, strong pure red which colorists would call Vermillion. There are often streaks of gold and dashes of carmine in throat. Old flowers are apt to turn pinkish. It is not so strong a grower as the previous ones but if given full sunlight and plenty of water, it is a profuse flowerer and one of finest cannas grown. Firebird was the first to be put on the market but it and President are not as sturdy growers and the flowers lack the substance of Fiery Cross. Height 4 to 5 feet.

CANDELABRA. Heavy, pointed green foliage. 3 to 4 feet high. Flowers in heavy truss of large flowers with broad petals of fiery orange red, not as deep as Fiery Cross nor as carmine as Wes. croc. Wonderfully fine.

Red Truss Flower
3 to 4 Feet High. Green Foliage.

DR. ROBT. FUNKE. Beacon, Beaute Poitivine, Crimson Bedder, Duke of Marlboro, Fanal, Grand Chancellor Bulow, Meteor, Pres. McKinley. These have smaller flowers but more blossom at one time into a truss of great beauty. They are a rich, crimson red and truss is borne well above foliage.

JEAN TISSOT. Pillar of Fire, J. D. Eisele, Express, Chas. Henderson, LaFayette. Same as preceding but color is scarlet or an orange red and very vivid.

HENRY GEORGE. Same as Dr. Robt. Funke but it is claimed they only grow 2 to 3 feet high. Plants are a trifle shorter than others.

MEPHISTO. Black Prince, Milwaukee. Same as Dr. Robt. Funke but flower is two cr three shades darker and naturally rather more crimson or blue-red. A true dragon's blood-red or ox-blood red.

JULIUS KOCH. Dragon, Same as Mephisto but trifle darker and larger petaled flowers of firmer substance.

Red Orchid Flowers
Bronze Leaves.

KING HUMBERT. Probably the most popular canna. I never have enough. Sturdy bronze foliage, immense orchid flowers of brilliant orange red often streaked with gold and broad rounded petals. 4 to 5 feet.

STATUE OF LIBERTY. Same as King Humbert save that plant grows taller, nearly six feet.

NOKOMIS. Vivid, dark crimson flowers with finely shaped, rounded petals. Very large but droop some. Flower half way between orchid and truss. 4 to 5 feet.

Red Truss Flowers
Bronze Foliage.

WM. SAUNDERS. Concowingo. A fine truss flower of clear, pure scarlet set in bronze leaves. Grows 2 to 3 feet high.

EGANDALE. Same but more erect truss, smaller flower but more blossom at a time and color a fine currant red, different from any other canna.

BRANDYWINE. Same but color is an intense vinous red mottled and edged with gold.

Orange Flowers

I am very fond of these orange cannas. They are all suffused with red, making a rich glow showing splendidly in a far corner of the garden against a back-ground of green, or if cut, lighting up a dark corner of a room. But like most orange shades, they must be kept by themselves.

INDIANA. 5 to 6 feet. Green leaves. Large orchid flowers on slender stems of a strong, vivid orange.

ORANGE BÉDDER. 4 to 5 feet. Green leaves. Large truss flowers of a true terra cotta orange lighter than Indiana and with touches of gold at edges and throat, very dazzling.

MARVEL. 3 to 4 feet. Green leaves. This truly marvellous canna is on outside yellow orange streaked with deep copper and inside a deep yellow turning into orange in throat. Indescribably rich when massed. It has been classed as Orange and Yellow but the general effect is orange.

WYOMING. David Harum. San Diego. Bronze leaves 4 to 5 feet high. In these the flower opens like a lily with stiff petals four to five inches across, a true orange without red suffusions, rich, velvety, strong.

Yellow Flowers
Green Leaves.

BURBANK. Austria, Buttercup. 3 to 4 feet. In these the flower opens like a lily with stiff petals of fine, lemon yellow, 4 to 5 inches across. A sturdy grower.

RICHARD WALLACE. Jane Addams, Goldbird, Queen of Yellows, Chas. Lutz. 3 to 4 feet high. Truss flowers of an exquisite shade of pure yellow fading to an almost white as flowers get old and with throat and bottom petal flecked with pink. Large handsome flower.

GUSTAV GUMPPER. 2 to 3 feet high. Many small flowers making a fine truss cluster of a soft orange yellow.

Cream and Rose

3 to 4 Feet High. Green Leaves.

NIEMEN. Johanna Kansleiter, Kate F. Deemers. A strong cream or very pale yellow with shadings of rose often becoming an amber as flower matures. Close to Richard Wallace but slightly different. Handsome flower.

ALBA ROSEA. Creamy white shading to peach blossom pink. Small flower with curved petals different from any other canna but bears profusely.
Gold Dotted Rose
4 to 5 Feet High. Green Leaves.

WM. BATES. Karl Merek Flower a pure yellow with tinge of orange and flecked with pink dashes becoming red in throat. Fine, large flower and large truss. Strong grower.

MME. ELIDA BERTIE. Princeton. Same as preceding but has so much more pink in its make-up that its general effect is pink while Wm. Bates is yellow. Wonderfully effective for table decoration in artificial light.

Gold and Apricot
Green Leaves.

GOLDEN GATE. When first opened, this flower is the true sun color, a glorious, uniform, golden yellow but it soon turns paler and pinker till it is a tender apricot and gold and the coloring is not in flecks, dots, dashes, borderings, etc., but smooth, one shade melting into the other. Flowers rounded and perfect in shape and firm substance.

Yellow Dotted Red
Green Leaves.

FLORENCE VAUGHAN. Queen Charlotte, Favorite. This old canna is still good; it is so gay as a bedder. Small flower but many of them and sturdy grower. A rich, golden yellow heavily spotted with red making it seen everywhere. 3 to 4 feet high.

THE GEM. Much larger flower and color a yellow spotted with carmin, radically different from preceeding in shades, size and shape of flower but not so prolific a bloomer.

QUEEN HELENE. Yellow King Humbert. This is one of the very best canna's there is, it is so sturdy a grower and prolific a flowerer. 4 to 5 feet high. Immense flowers mainly a rich golden yellow spotted heavily with vermilion. This is a recent crossing and is in unstable equilibrium. Usually the leaves are green but sometimes they are all bronze, sometimes streaked with bronze. At times, the flowers will be all red, then yellow spotted with red, then ha f a petal will be scarlet. Very interesting.

GLADIATOR. Same as preceding but the red is stronger and less orange and instead of being in dots, it is in throat and slashes up the petals, very effective.

Scarlet and Gold
3 to 4 Feet High. Green Leaves.

ITALIA. General Merkel. The flowers on these are a bright, orange-scarlet with broad golden border and mottlings and lay out flat in orchid style like flouncing flags.

DUCA DI OTRANTO. Mad. Selbert. The petal's on these are a rich Indian yellow or golden orange changing into a throat of solid, glowing carmine. Not so large as Gladiator but deeper colors, lily shaped, very lovely and striking.

Vermillion and Gold
3 to 4 Feet High. Bronze Leaves.

MME. CROZY. Souvenir de Antoine Cropy. Small flowers but prolific in flowers. A striking rich vermilion edged with gold, lovely for massing. I really think there was a difference between these two canna's but I have had them from two to three sources and they have invariably been mixed. Some day will carefully sort out and then Mme. C. will be 2½ to 3¼ feet high and S. de A. C. 3 to 4 feet high. Mme. C. will have vermilion edged with gold and smaller flowers but very floriferous and S. de A. C. will have large flowers and pure vermilion with gold shashes in throat. Both will have pointed petals.

GAIETY. Cheerfulness. A taller canna producing great clusters of true canna shaped flowers with big rounded petals. Color a strong orange red with gold throat and edgings. Very bright and gay.

Crimson Edged Gold
3 to 4 Feet High. Green Leaves.

GLORIOSO. Niagara. Medium flower but large truss. Color a blood red with margining of gold, wonderfully effective.

Orange and Gold
Green Leaves.

ALLEMANIA. The flowers in this good, old canna spread out flat of a brilliant orange spotted and mottled with deep reddish gold. 4 to 5 feet high.

FLAMBEAU. F. Benary, Long Branch. Taller and larger flowers. The orange is more vermilion and fiery and the yellow is an edging instead of a mottling. So brilliant, it is a true flambeau or torch of flame.

Orange and Scarlet
3 to 4 Feet High. Green Leaves.

PANAMA. Flowers large, 4½ to 5 inches across with big rounded petals often 2 inches wide. Color a strong terra cotta red with throat, bordering and spots of golden yellow. When old, fades to dull pink.

Apricot
3 to 4 Feet High. Bronze Leaves.

HIAWATHA. Ehrenfels, John Farquhar, Faišen Dore. Full truss of medium flowers of a very unusual apricot and salmon. Effective by themselves but do not mix well with other colors.

APRICOT. Green leaves. 3 to 4 feet high. Medium sized flower with broad rounded petals of handsome shape and thick truss of flowers. Colors are orange pinks, gold and buff fruity colors. Unique.
Salmon Pink

3 to 4 Feet High. Green Leaves.

SALMON QUEEN. L. Patry, Arc-En-Ciel. A new canna but similar to the two names following but much better. Truss flowers, moderately large, 4 to 5 inches across with rounded, broad petals of an exquisite pink shaded with yellow into a salmon and shading to Carmine in throat. Very lovely.

Pink

3 to 4 Feet High. Green Leaves.

WEST GROVE. Louise, Lovliness, Mlle Berat. Moderately large flower with narrow petals, color a deep cerise or blue pink.

ROSEA GIGANTEA. Francis Bertie. Same but larger flower with more rounded petals and fuller truss. Would substitute for others but not a sturdy grower.

Pink Flowers

Bronze Leaves.

SHENANDOAH. 3 feet high. Rather small salmon pink flowers born in a truss and much finer in moist weather.

WABASH. Same but grows 4 to 5 feet high. Flower trifle larger.

DR. E. ACKERNECHT. 3 to 4 feet high. Flowers in a loose truss with broad petals and of large size. Color a rich cerise pink with fleckings of deeper Carmine. Very lovely.

Rose Flowers

3 to 4 Feet High. Green Leaves.

HUNGARIA. Very compact, almost dwarf plant and of luxuriant growth. Truss flowers, with broad rounded petals and large flower. Color a blue pink, the shade of a deep La France rose and with a touch of cream in throat. Very effective for massing but flower does not last well.

ALAMO. Same but flowers are larger and of stronger substance.

WESLACO. Same but flowers are of so strong and clear a deep rose as to be almost a red. Unusual and striking.

MRS. A. F. CONARD. One of the most popular and exquisite of cannae, The flower has the ideal canna shape with broad, rounded petals opening wide and on a heavy filled truss so as to hide past blooms. Color an exquisite soft, opaque pale pink with darker pink in throat till it is almost a brown.

CITY OF PORTLAND. Same but color is a deeper rose pink and flowers in great profusion.

Rose and Gold

3 to 4 Feet High. Green Leaves.

VENUS. One of the best of this class with beautifully shaped flowers of firm substance and clear rose pink with golden edges and throat. Borne high and sturdy grower.

GLADIFLORA. Uhberg. Same but not so strong a grower. Dwarf plant and the pink is darker and gold stronger.

HARLINGEN. A taller plant with large flowers and the pink is stronger but lighter in shade and the gold is laid on in streaks and edgings and not in suffusions as in others. Very effective.

ROSSINI. An exquisite pale salmon pink shading to golden yellow in throat and with pale gold edges.

Rose and Cream

3 to 4 Feet High. Green Leaves.

LA DONNA. Wawa. A light shade of soft pink underlaid with cream and with creamy edges.

White Dotted Rose

3 to 4 Feet High. Green Leaves.

FLAG OF TRUCE. One of the most beautiful of canna with immense overlapping petals and large flowers. Color a true white with pink spots in throat, but at a distance appears pure white.

White Flowers

3 to 4 Feet High. Green Leaves.

MOONLIGHT. Flowers small but bears many trusses and an almost clear white. Strong grower.

EUREKA. Maros, Mont Blanc, Blanche Wintzer, Snow Queen. Full trusses of large flowers with broad, rounded petals. Color nearly a pure white in moist cloudy weather. In sunny weather, a cream. The nearest white of any. This strain has been selected out as strong grower.

Foliage Cannas

FLASHLIGHT. 5 to 6 feet height. Large strong leaves of soft green very effective as a background or screen, with clusters of small bright red flowers.

KING OF BRONZES. Immense red bronze leaves growing 5 to 6 feet high with rounded ends and luxuriant growth. Flowers small but pretty trusses of bright red.

MAJESTIC. 5 to 6 feet high. Bluish-green foliage lined with bronze. Small red flowers.

MUSAFOLIA. The tallest canna grown. 7 to 8 feet. A rapid grower. Leaves a dark green edged with purplish bronze and often 4 feet long. Small red flowers.

CRINUMS OR SOUTHERN LILIES

**NOTE.** The great order of plants called "Liliflorae" embraces most bulbous plants bearing lily-like flowers. Right next to the true lilies, the Family of "Liliacee" comes the Family of "Amaryllidaceae." Most of the true lilies require a cold, dormant season and are forest plants requiring shade. They are only suited to temperate climates and to shady places, requirements not usually found in gardens.

Most of the Amaryllidacea blossom in full sun and grow in warm soil. They are semi-tropical and require winter protection and much ching, in the latitude of Dallas and Atlanta, in the latitude of St. Louis and Philadelphia, taking inside.

They like a sandy soil, a sunny place, good drainage and plenty of water and then the flowers they produce are wonderful. Most of them can be forced so as to flower in a green-house or be started in a green-house and then grown out of doors.

The sub-family of Amaryllis usually only flower once a year and some of them, grow leaves and then the leaves die down and the flowers grow from bare ground.

But many others of the sub-families of Crinums, Hyacinthoides, etc. flower again and again and are wonderfully beautiful. They are distinctly the "Lilies of the South" and can be successfully grown as far north as St. Louis and Philadelphia and with care as far north as New York and Chicago.
MILK AND WINE LILY. (Crinum Sanderianum). Strap leaves 3 inches wide and 2 feet long, flower stalk 2 feet high with from 3 to 6 buds opening out exquisite flowers with waxy white petals with broad strip of deep carmine down center.

ANGEL LILY. (Crinum Fimbriatum). Same sort of plant but flowers are larger with just a touch of cream in their white and a faint stripe of soft pink down center. At a distance the effect is pure white.

SPIDER LILY. (Hymenocallis Carrubearum, also called Pancratium Carrubearum). Same sort of plant but flowers a pure white, has a tube about 6 inches long which spreads out 2 inches in diameter with delicate frilled edges from which comes six rays of pure white terminating in the yellow pollen anthers.

CONFEDERATE LILY. (Crinum Erubescens). Larger plants than preceding, leaves often 4 inches broad and 4 feet long. Flower stalk rises 2 1/2 to 3 feet high, crowned with 15 to 25 buds opening to hanging, trumpet shaped lilies of soft cream striped on outside with deep rose, fading inside to loveliest shell pink.

PRICE OF ABOVE FOUR: $1.00 per dozen, $7.50 per 100, $60.00 per thousand.

LILY OF ORINOCO. (Crinum Kirkii). This plant makes a rosette of leaves closer to ground and leaves are sword-shaped and crinkled-edged. Flower stalk rises 2 1/2 to 3 feet with wide-opening lilies of dazzling white with broad band of purple down center.

ARGENTINE LILY. (Crinum Ornatum). Same as preceding but flowers are more trumpet-shaped and drooping and band is cherry-red instead of purple.

LILY OF GRANADA. (Crinum Kunthianum). Very similar to preceding three but larger plant than Confederate with taller flower stalk and stalk is purplish in color. Flowers open wider although generally drooping. Band down center petals, reddish purple. Very lovely.

WHITE CAPE LILY. (Crinum Capense Alba; probably same as C. Powellii). This is almost an exact duplicate of the Easter Lily in its flower but has the habit of growth of the Crinums. Its flower is pure white and it blossoms here from April to September.

PRICE OF ABOVE FOUR. $1.50 per dozen, $10.00 per 100, $80.00 per thousand.

LILY OF VIRGIN. (Crinum Virginicum). Large plant with wide opening flowers of large size and dazzling white with faint pink line down center. Fragrant and very lovely. Small stock.

LILY OF THE DAWN. (Crinum J. C. Harvey). Same but trifle smaller flower but color a pure, soft rose all over. Fragrant. Small stock.

PRICE OF ABOVE TWO: $5.00 per dozen, $30.00 per 100.

LILY OF ASIA. (Crinum Asiaticum). Immense plant requiring a space 5 feet diameter and growing 4 feet high with stiff, long leaves and flower stalk 3 to 4 feet high with 30 to 50 buds opening into flowers similar to Spider Lily but with shorter and stiffer rays. Very striking. Pure white and fragrant. A single bulb will weigh 6 to 8 pounds.

RIO GRANDE LILY OR GREAT MOGUL. (Crinum Augustum). Even larger than preceding and flower stalk has often 50 buds opening into purple and white lilies, very striking.

PRICE ON ABOVE TWO: $1.50 each, $15 per dozen. Other varieties being tested out.

Fairy Lilies

These dainty little plants look like a grass with leaves nearly that of grass but thicker and more fleshy. The flowers usually come after rains and star the sod or border where planted. My stock was nearly killed eighteen months ago and is small now; hence high price.

WHITE FAIRY LILY. (Zephyranthes Treadeae). Pure white flower 1 1/2 inches across with yellow stamens. Rises 6 to 8 inches from ground.

PINK FAIRY LILY. (Zephyranthes Carinata). Longer leaves and flat and flower larger and lovely pink about 2 inches across.

OK-BLOOD FAIRY LILY. (Hippeastrum Habranthus; not sure of this name). These flower in fall with a deep, rich, wine-red flower, very graceful.

WHITE RAIN LILY. (Cocperia Fedunculata). Native to this section. After every rain it bears a fragrant, star-shaped white lily something like a lovely crocus. There is a yellow flowered variety of this growing in matsby places which can often supply.

PRICES: $1.50 per dozen, $10.00 per 100.

GURNSEY LILY. (Nerine Sarniensis). The leaves grow in spring and then die down completely. In early fall, a flower scape rises from base ground 10 inches high bearing 4 or 5 flowers, each with six petals an inch long so that each flower is 2 inches across. Petals are one-quarter inch wide, slightly crisp and of a lovely brick-red shading darker in center. Each has 7 filaments 2 inches long curved outwardly, giving the flower a most unusual and striking effect.

PRICE: $4.00 per dozen.

Day Lilies

TAWNEY DAY LILY. (H. Fulva). Flower 4 to 6 inches across, a golden-ye-low in throat melting suddenly to a tawney orange-brown shading lighter at crinkled edges and with a fine line of yellow down center.

PRICE: $1.00 per doz., $5 per 100, $40 per thousand.

KWANSO DOUBLE DAY LILY. (H. Kwanso). Same but double. Comes from China and extremely lovely with its many varied petals.

PRICE: $1.25 per doz., $7.50 per 100, $60 per 1000. All above can be shipped at any time.

Tuberoses

(Provanthes Tuberosa Mexicana). Few know the value and beauty of this flower. It comes from the high, central Mexico tableland. It has tall, stiff stems, flowers pure white, single, delightful fragrant, never blights and opens in hottest weather, withstands winds and everything but hard frosts. Can be forced. If stalk is cut when flower first opens and put in water, flower increases in size and whiteness and can be kept a week or ten days. Flowers stand transportation well.

PRICE: $2.00 per 100. $15 per 1000. Stock about 25,000.
CRINUMS OR SOUTHERN LILIES
WONDERFULLY BEAUTIFUL FLOWERS
LARGE BULBS. EASY OF GROWTH.

Need winter mulching latitude of Dallas and Atlanta. Should take inside latitude of St. Louis and Philadelphia.

ANGEL LILY
Exquisite in their combination of Ivory White or luscious cream with soft pink, strong carmines, deep purples with a good start and good care, three, or if season is long, four crops of flowers can be had. They like full sun.

SPIDER LILY
GROUND STORAGE is had for all bulbs. That is, they are not dug until wanted to ship so you get fresh, plump, strong, quick-growing bulbs.

CONFEDERATE LILY

WHITE CAFE LILY
Duplicate of Easter Lily
